

S329541

August 15, 1993

Dear Mrs. George Farmer:

Per your instructions I'm enclosing two separate checks made out to the Department of Ecology for our water permit application. I hope this delayed priority date does not adversely affect our application. The wait will be worth it if after the salmon issue summit next year, the permit is granted as needed.

At this time I am also applying for permits to install a pipe across the National Recreation Area boundary as administered by the Department of the Interior and the Army Corps of Engineers.

This proposed system will be similar to other water appropriation systems permitted in the same area.

Sincerely,
Paul Rugloski

5329541

Dear Mr. George Farmer:

My brother and I thank you and your staff for the patience and assistance in getting our water questions answered.

We are enclosing an application for a water permit for domestic use at our land on Lake Roosevelt. Although most permits are 'on hold' until the salmon issue is addressed we feel confident that normal domestic uses will be allowed, as it was not the intent of the salmon/electric/irrigation coalition to deny drinking water to land owners.

Although the application establishes a priority date for our permit once the salmon issue is addressed, a temporary special use permit may be needed in the interim. Please consider all options open to use when evaluating this application.

Please advise me as to which paper I should use for listing the "notice of intent to withdraw water and for how long. The projected start date of our water system is in July of 1994.

Your personal attention in meeting the needs of granting this permit is greatly appreciated.

Sincerely,
Paul Rugloski
